

## “How to Prepare for Successful Electronic Visit Verification”

**Joe Schnur**

January 2019

## About Us

A leading SaaS technology company driving the national expansion of **Electronic Visit Verification (eVV)** for State Medicaid, MLTSS Payers, and Providers

# Our time today...

- EVV history and the 21<sup>st</sup> Century Cures Act
- State status and models
- EVV Solutions and how they work
- Provider value
- Implementation timelines
- Demo of Tellus mobile app

# EVV History and “The Mandate”

# What is EVV?

Mobile technology required by the 21<sup>st</sup> Century Cures Act for personal and home health care:

- **Accurately verifies visit activity** and services delivered for personal and home health care
- **Provides transparency** via real-time data to improve recipient outcomes, operational efficiencies and program integrity
- **Improves communications** between caregivers in the community and onsite with members and their administrators
- **Reduces Medicaid fraud, waste, and abuse**

## 21<sup>st</sup> Century Cures Act

- In December 2016, President Obama signed into law the 21<sup>st</sup> Century Cures Act
- Section 12006(a) of the bill directs States to require the use of an EVV system for Medicaid-provided personal care services and home health services
- States that do not require a system for personal care services and home health services by the mandated deadline of 1/1/2020 will face escalating reductions in federal funding
- To fulfill the federal requirement, an EVV system must provide the following information:

Date of service

Type of service

Location of service

Individual receiving service

Name of individual providing service

Time the service begins and ends

## Benefits of EVV

Reduced Fraud,  
Waste, and Abuse

Greater  
Transparency

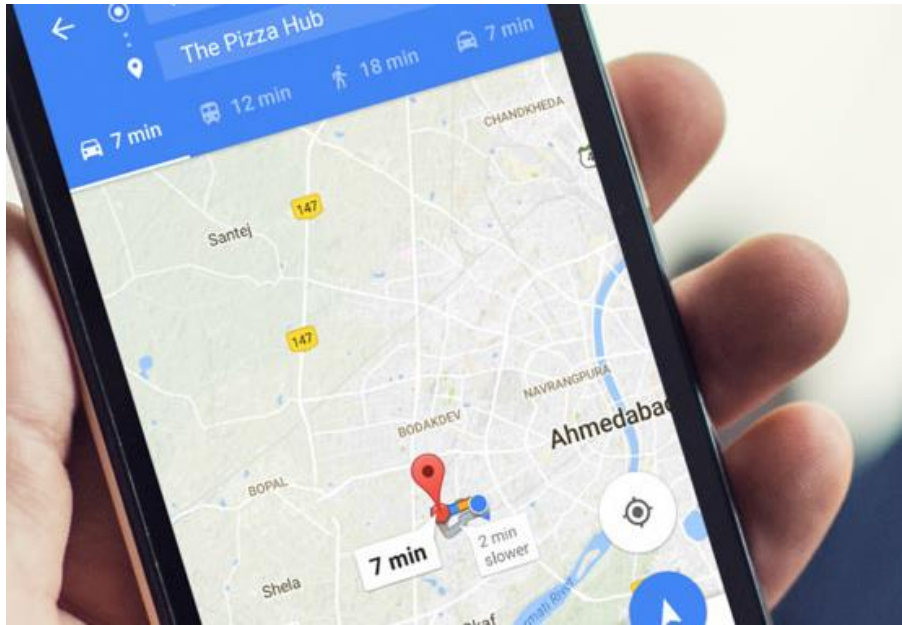

Improved Care  
Outcomes

## eVV Alternatives

- **GPS** — Standard Offering
- **Small Alternative Device (SAD)** — Proof of Concept
- **IVR** — Standard Offering
- **Paper** — Standard Offering (last resort)

# Current State Regulatory Environment

21

states have made a decision regarding their EVV Vendor

6

states have an RFP in process

70%

states have elected the open model regulatory model

22

states have taken no action regarding the EVV mandate

To meet the requirements, States have adopted different approaches to EVV

Medicaid EVV Total Addressable Market

\$50 million

Several green dollar bills are shown floating around the number 50.

# State Implementation Considerations

## EVV Models Implemented to Date:

1. State Choice (Closed)
2. MCO Choice
3. Provider Choice
4. Hybrid Models (Open)

### Satisfy the Mandate

Collect and report  
on the 6 required  
data points

### Go Beyond the Mandate

Utilize collected data for

- Claims Processing
- Performance Analytics
- SIU/FWA Reporting

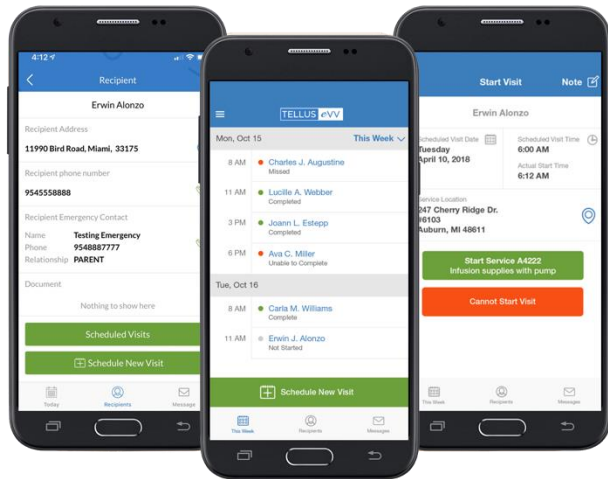

A healthcare professional in a light blue uniform is holding a smartphone. The phone screen displays the TELLUS logo. The background is a blurred clinical setting.

# EVV System Components

## CAPTURE

Point of Care check in,  
check off & check out

## MANAGE

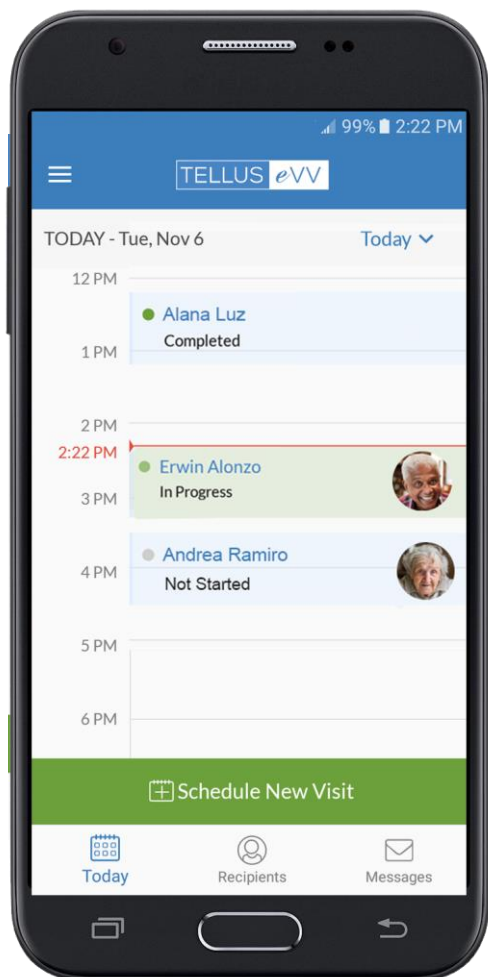

Real-time data  
management

## PROCESS

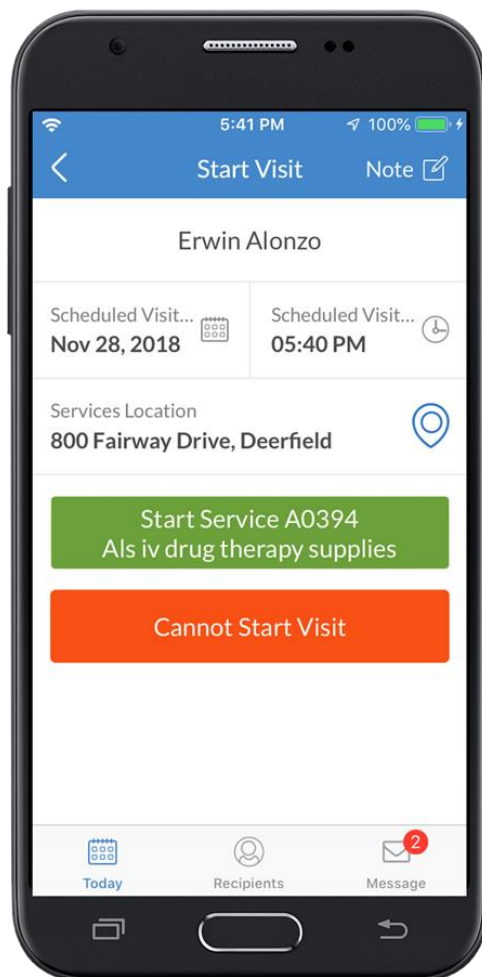

Visit Verification, Data  
Aggregation &  
Fraud-Waste-Abuse BI

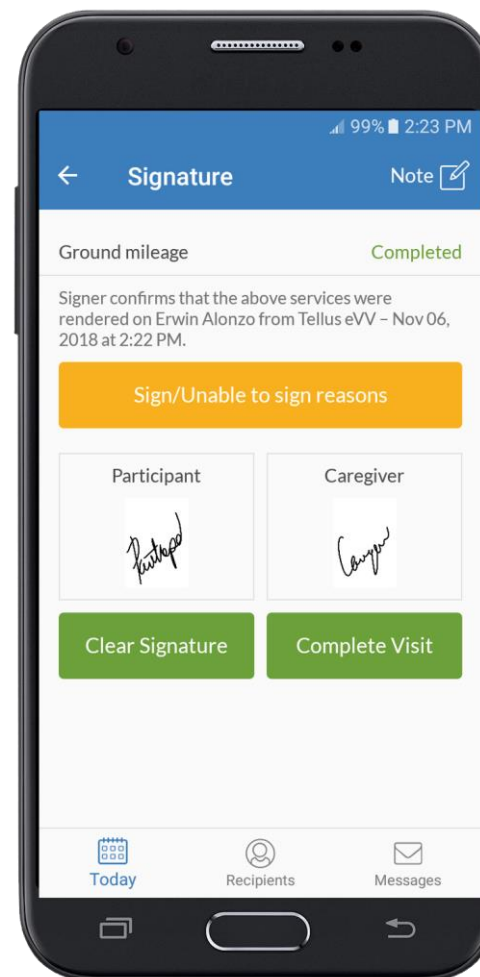

# Capture: Caregiver Experience

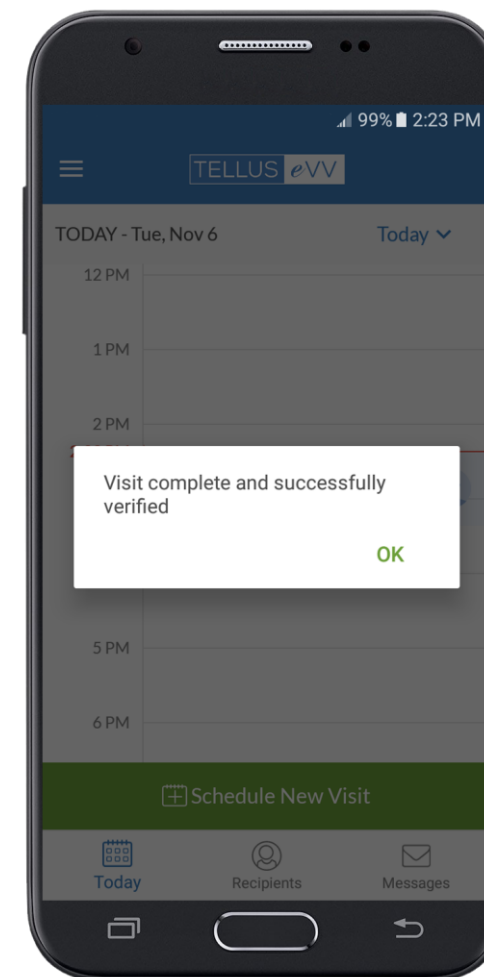

Manage  
Schedule

Check In

Check Out

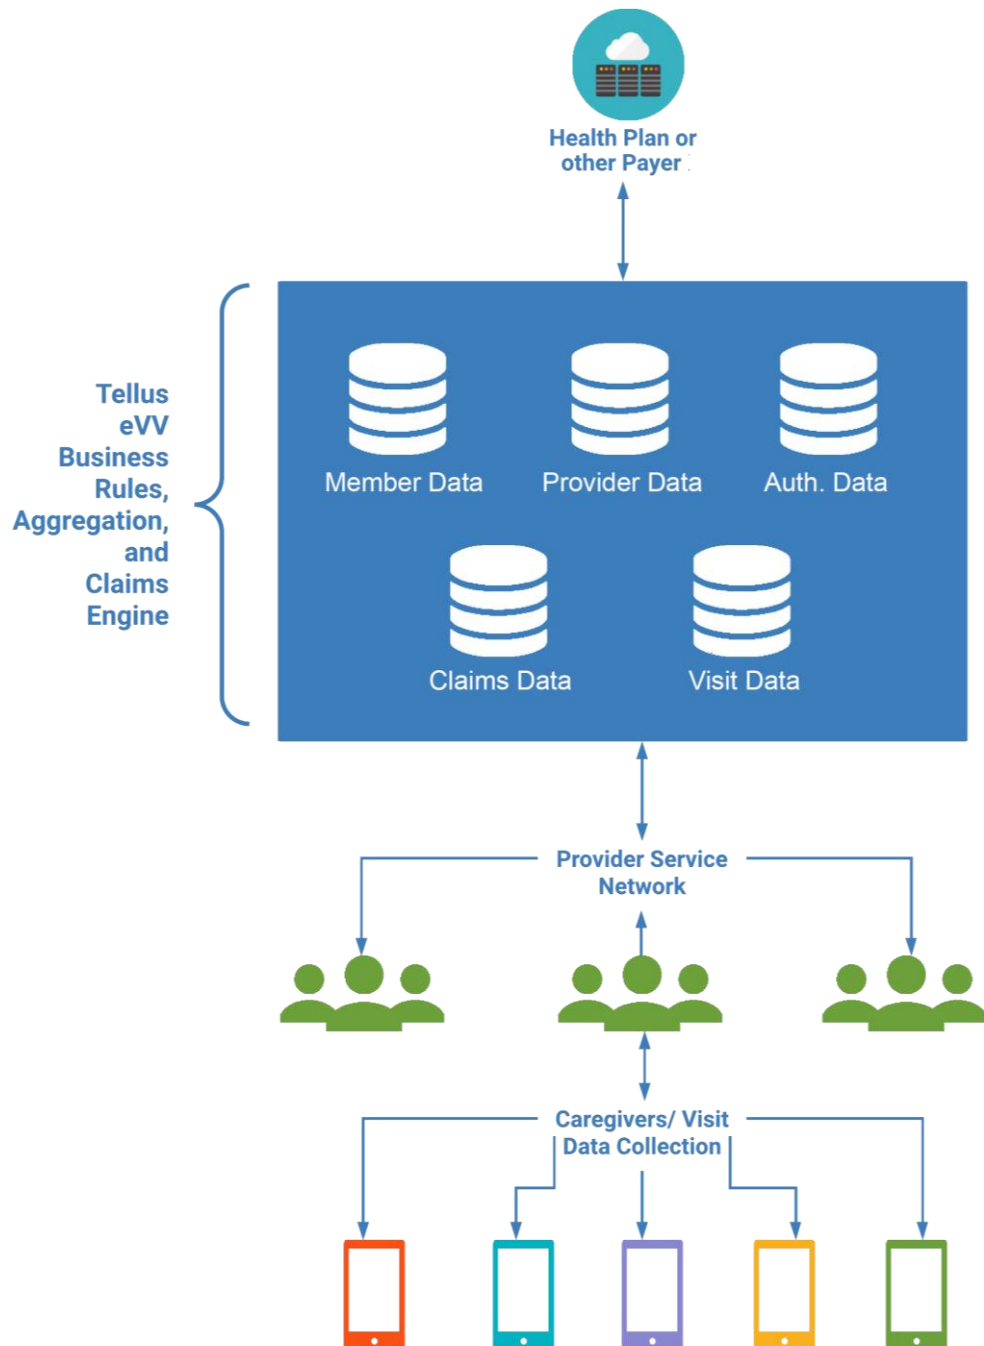

Verify

# Manage: Payer Analytics

- Provider Performance
- Network Adequacy
- Service Delivery
- Visit Efficiency
- FWA

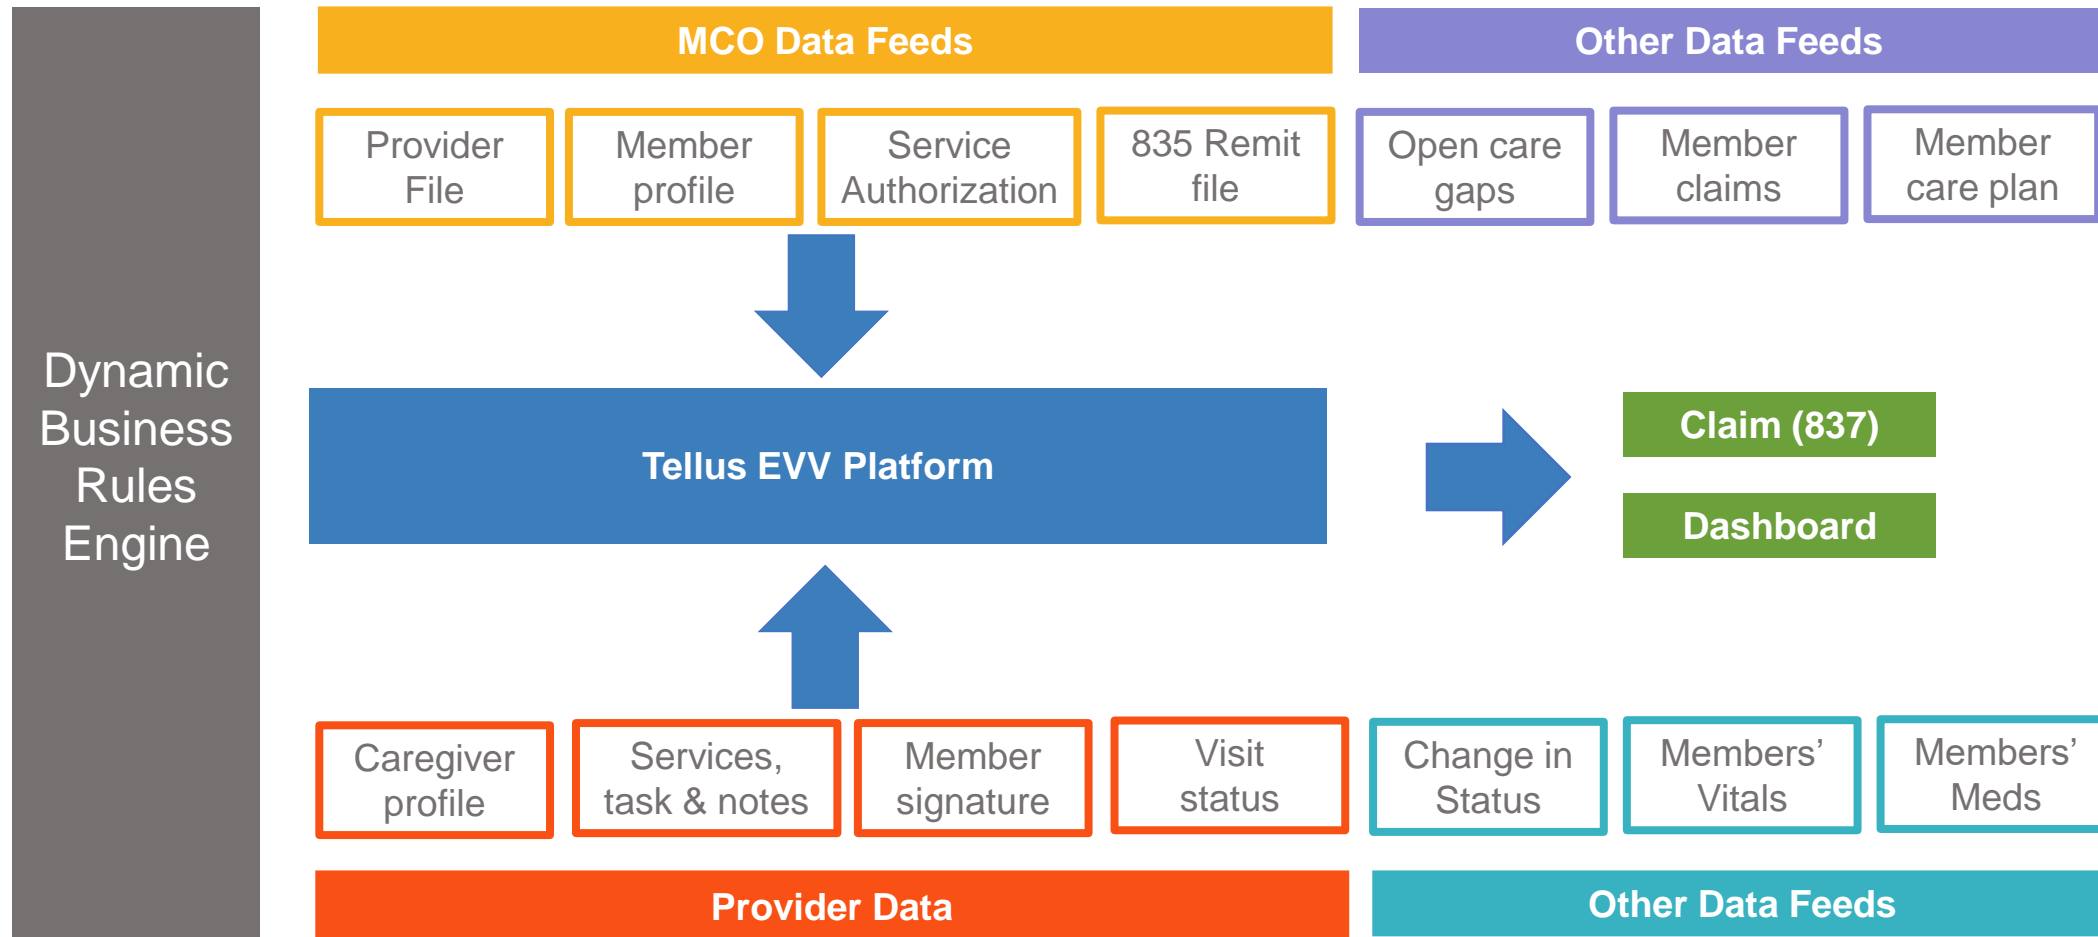

# Process

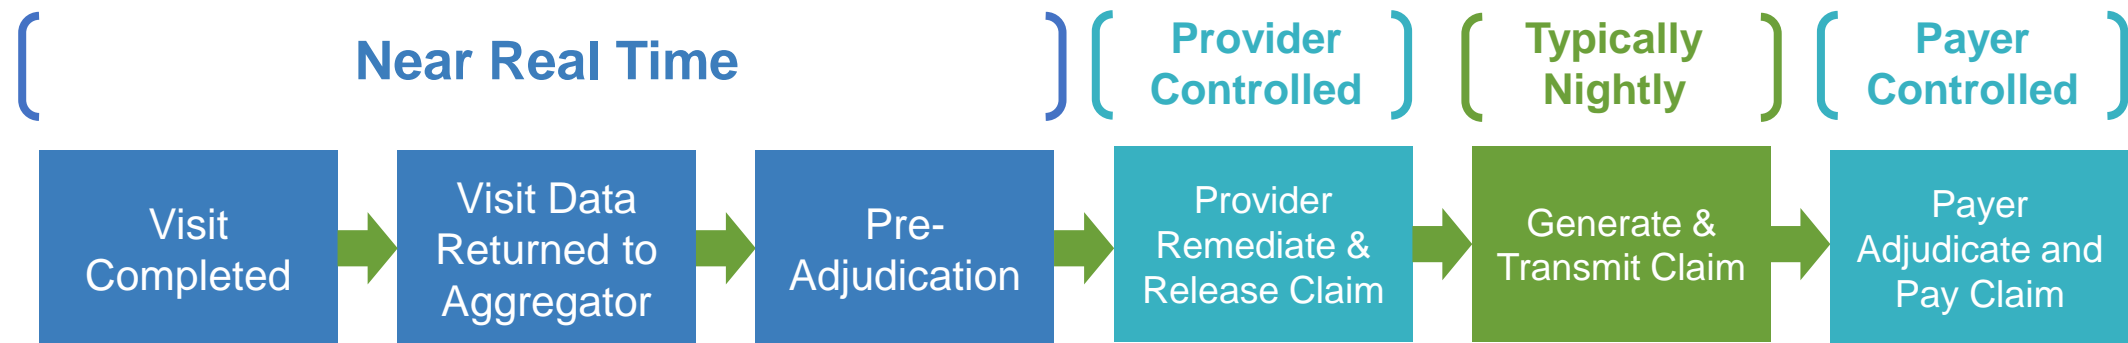

- Aggregate visit data from multiple sources
- Cleanse data for formatting errors
- Visit Verification
- Match visits against Eligibility & Authorizations
- Process payer-specific business rules
- Provider portal for claim edit & submission
- 837P export to payer
- 835 reconciliation

# Data Aggregation

# Processing Timelines & Controls

## EVV Greatly Improves Provider Revenue Cycles

# Benefits of EVV

## Federal Mandate

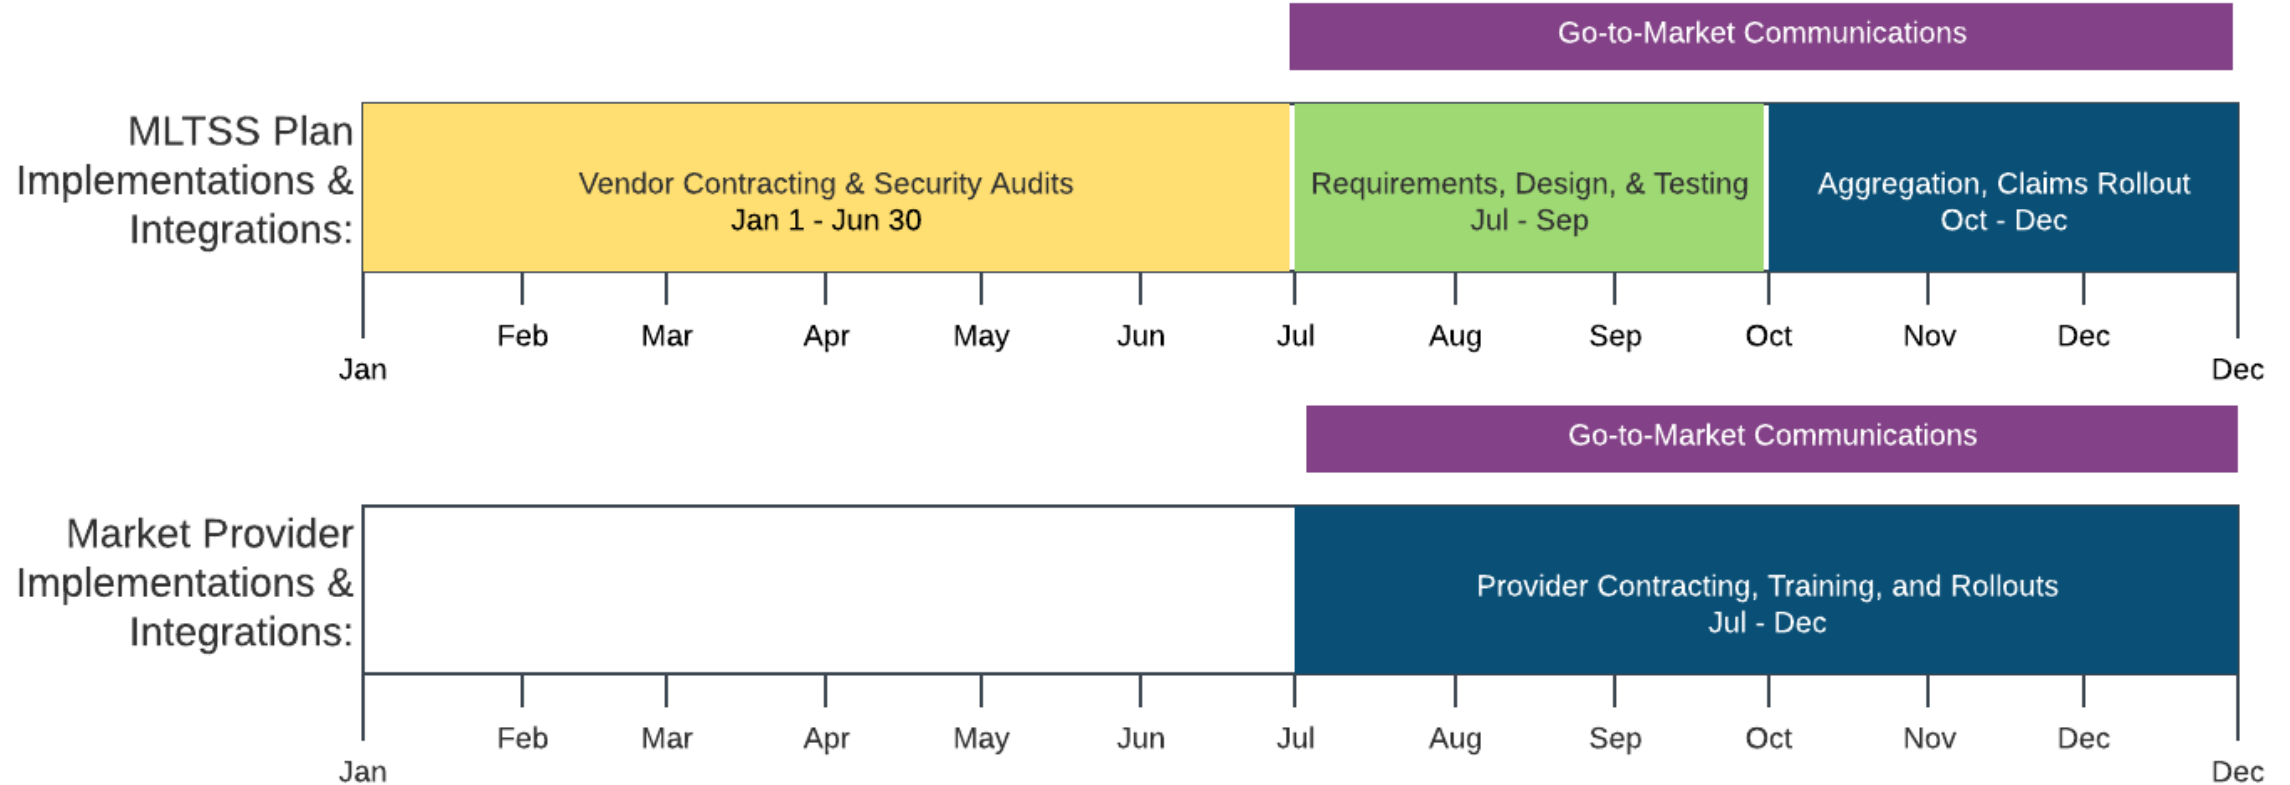

### Providers

- ✓ Paperless workflow
- ✓ Visualize care delivery in real time
- ✓ Communicate with caregivers
- ✓ Centralize authorizations
- ✓ Automate claims submission
- ✓ Shrink revenue cycle

### Managed Care Organizations

- ✓ Visualize care compliance
- ✓ Holding providers more accountable
- ✓ Clean claims
- ✓ Compare provider performance
- ✓ FWA Analytics
