**Topic:** "Fire Stopping Inspections"

As many of you may already know, Chapter 17 of the 2012 International Building Code (IBC) and 2013 California Building Code (CBC) for Special Inspections now requires 3<sup>rd</sup> party inspections for Firestop penetrations and Fire Rated Joints on certain projects. Moving forward with these new changes, there will be a uniform system required for these inspections that may be unfamiliar to some and therefore require further clarifications. Structure Groups will be presenting an overview of this new system and answer any questions you may have.
