

James Becker attended and graduated from Arlington High School and earned EMT certification at Metropolitan Community College. In the fall after he graduated, James attended the University of Nebraska at Lincoln (UNL). After a year and a half at UNL, James decided that he wanted to come into work and learn the company. He completed all of his general education classes at UNL and is now attending Metropolitan Community College part-time at nights to earn a business management degree.

During the day, James is working full-time as a crew foreman and running jobs at Becker Trenching and Water. He has been full time and a crew foreman for 6 years. James is also in the office as an estimator taking off jobs and putting a price on them. He is learning how to do administration work and accounting. James is striving to learn as much as he can so he can be a valuable business leader.

James said, "I would like to be considered as a candidate because I feel that it would be a good way to get to know people in the field of work that I do. It also would be a good way to network with other professionals in underground utilities. Being on the NUCA of Nebraska Board of Directors would help me out on the professional side of business leadership and help me grow as a business leader.

Thank you for considering me as a candidate and I hope that I can be a valuable asset on the board of directors. It will be fun to see what the future brings."
